Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/750,616	Applicant(s) NAGLE, JAMES L.	
	Examiner John Ricci	Art Unit 3712	ce

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3712

The abstract of the disclosure is objected to because the abstract should include a more complete discussion of the invention. Correction is required. See MPEP 608.01(b).

* * * * *

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the elliptical ring (claims 3, 9) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

* * * * *

Claims 4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4, it is not clear if the "resilient means" referred to on line 4 is the same as the resilient means of line 5.

Claim 9 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the

Art Unit: 3712

claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim 7 requires a circular ring, but claim 9 is for an elliptical ring.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 7, 8, 10, & 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Pinto 6,557,541.

Pinto shows an arrow rest including a ring having a central opening for supporting an arrow, which is mounted by means of a bracket. The bow would otherwise be functional in a "conventional manner" with the arrow rest removed. The bracket can be installed on the bow without "permanent

Art Unit: 3712

modification" thereof. The ring may be made of a resilient high friction material such as plastic.

* * * * *

Claims 1-3 are allowed.

Claims 4-6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The prior art does not disclose an arrow rest including a ring pivotally mounted on a bracket, means to rotate the ring to engage an arrow with the ring when the bow is drawn, and means to rotate the ring to a position which disengages from the arrow.

* * * * *

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
